

This slide on the NE face of Blackmore was triggered by the second skier. It was 8-12" deep and 100' wide and likely failed on small faceted crystals underneath the new snow. No one was caught. Going one at a time was good travel behavior that can save our lives when things go wrong.

Advisory Region Northern Madison Longitude -111.00W Latitude 45.44N

Avalanche Details: Skier triggered avalanche on Mt. Blackmore
