

# **GNFAC Season Summary 2021**

Submitted by Doug Chabot on Tue, 04/13/2021 - 09:33

We just ended our 31<sup>st</sup> year of operation after a winter of increased backcountry traffic on an avalanche prone snowpack. The season started on October 14 with an early season snowstorm and first recorded avalanches. We issued 12 early season bulletins before the start of the daily forecasts which ran for 121 days from December 12 to April 11.
