

Wet Slide off Bridger Ridge near Baldy

Other place

Bridger Range

4/11/2023

Code

WL-N-R3-D2-O

Elevation

7200

Aspect

E

Latitude

45.73260

Longitude

-110.96200

Notes

While descending from a trail “run” (definitely more of a post hole) up towards Baldy, I saw a medium-sized wet [slide](#) on the eastern side of the ridge underneath some large rocks. The [slide](#) was roughly 15-20’ across at the portion I could see and traveled several hundred feet down the mountain. I could hear trees snapping (sadly in the video I don’t think you can, as my breathing is way too loud) and watched the avalanche move for almost a minute. I was very thankful for my careful route finding and avoidance of steep slopes!
