

preserved SH on Ellis

Date

Sat, 02/08/2025 - 13:50

Activity

Skiing

Location: N shoulder Ellis, in open treed area well off ridge and protected from prev. wind effect. El about 8000', Asp NE. Slope 15 deg.

HS 150cm. Found preserved SH 5-8 mm at 98 cm. 1F slab above the SH, 1F+ below. CTM17 and 12, SP, on this layer dn 52 cm. ECTP21. 4 out of 5 lemons.

Folks are skiing the going home chutes and the burn in that zone without? incident.

Could be the classic MT Ellis setup where it never quite snows/blows enough to get action.

Region

Northern Gallatin

Location (from list)

Mt Ellis
